IDEAS / UX + UI / FRONTEND

Curiosity in motion.

I’m Thiên Phúc. I explore ideas, shape interfaces and bring thoughtful digital experiences to life.

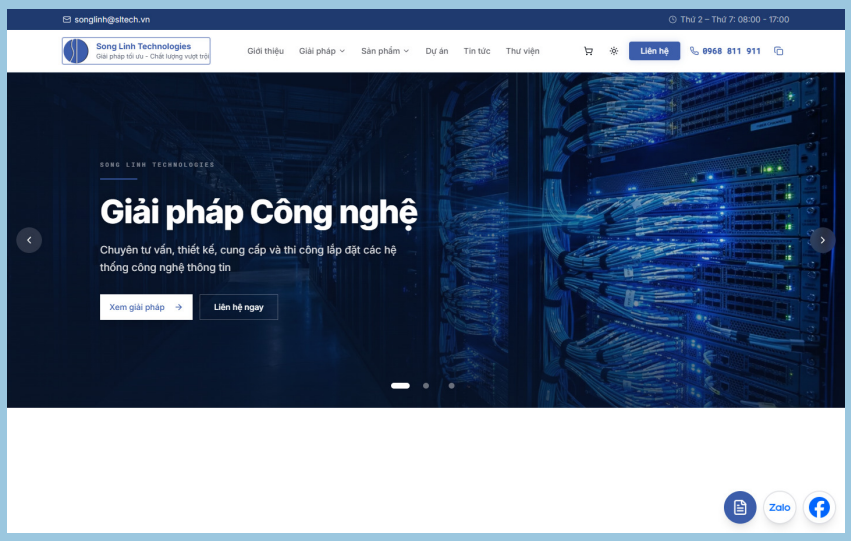

A LITTLE ABOUT ME

Games brought me into IT; curiosity led me towards design. I like exploring new ideas and comparing possibilities. Away from the screen: the gym, cycling, walks and nature.

01 / TECHNOLOGY

SLTech

A digital presence for the work behind the business.

CONTEXT

A company website for an audience of partners and major project owners.

MY CONTRIBUTION

I shaped the ideas, UX/UI, imagery and layout. AI agents supported implementation and testing; I reviewed and guided the visual direction.

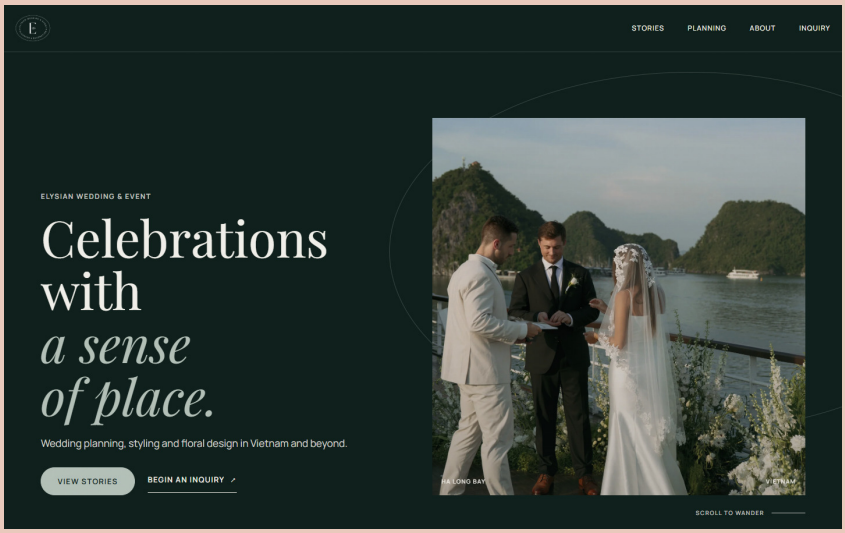

STATUS

The public website is available to explore.

02 / WEDDING

Elysian Wedding

A personal story, explored through design.

CONTEXT

A wedding website created for an acquaintance, shaped through visual exploration and conversation.

MY CONTRIBUTION

I start with the client’s ideas and references, use AI to create sample options, review them and refine the direction after feedback.

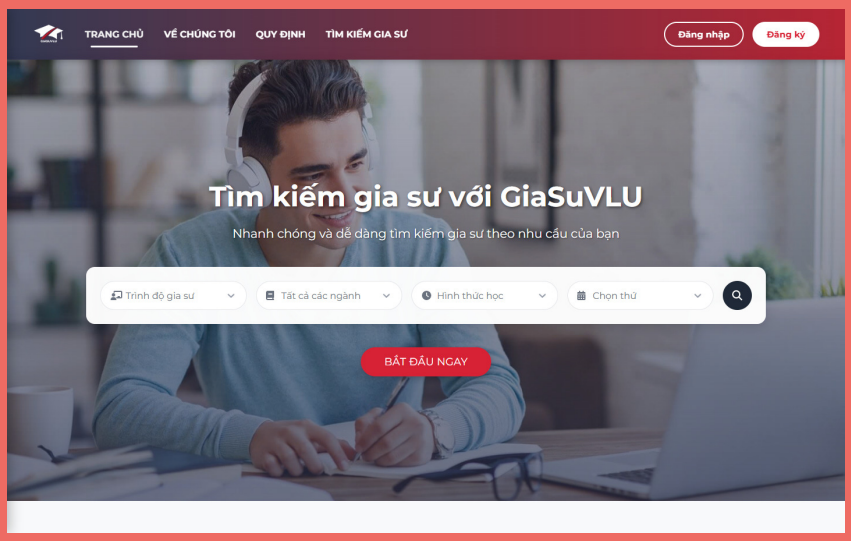

STATUS

The public website is available to explore.

03 / TEAM CAPSTONE

GiaSuVLU

An interface connecting learners and tutors.

CONTEXT

A team graduation project exploring a tutoring platform for learners and Van Lang student tutors.

MY CONTRIBUTION

I decided the UX/UI and interface flows, developed the frontend and connected APIs. My teammate primarily built the database and APIs.

STATUS

Microsoft school-email sign-in worked. Zoom and payments reached API tests only due to legal and cost constraints; the backend is currently unavailable.
