IDEAS · UX/UI · DIGITAL PRODUCTS

Ideas, made to feel.

I’m Thien Phuc — a maker interested in shaping digital experiences, from exploring ideas and layouts to refining an interface.

ABOUT ME

I came to IT through games. I enjoy learning new things, exploring alternatives and selecting a direction that fits people and context. Away from the screen: the gym, cycling and nature.

B2B WEBSITE / 2026

SLTech

Turning technical capability into a clear story.

CONTEXT

The company works mainly with partners and major project owners; the website needs to communicate its capabilities and projects credibly.

CONTRIBUTION

I directed ideas, UX/UI, imagery and layout, using AI agents to support implementation and testing.

STATUS

The website is live and presents the company’s solutions, products and projects.

WEB EXPERIENCE / 2026

Elysian Wedding

Designing a space where a story can be felt.

CONTEXT

A wedding and events website made for an acquaintance, placing story and feeling at the heart of the experience.

CONTRIBUTION

I start with client ideas, review AI-assisted samples and refine the visual direction with client feedback.

STATUS

The website is available to explore directly using the link below.

TEAM CAPSTONE / 2025

GiaSuVLU

Connecting learners with Van Lang student tutors.

CONTEXT

A platform designed around finding a tutor, registering and learning online, with flows for learners and tutors.

CONTRIBUTION

I shaped the UX/UI and interface flows, developed the frontend and connected APIs. My teammate primarily built the database and APIs.

STATUS

Microsoft school-email sign-in worked. Zoom and payments reached API tests only due to legal and cost constraints; the backend is currently unavailable.

REACT / API / MICROSOFT
