UX/UI · IDEAS · DIGITAL EXPERIENCES

Stay curious. Experiment. *Make things.*

Hi, I'm **Thien Phuc**. I shape digital experiences from ideas, curiosity and a healthy number of possibilities.

ABOUT ME

I came to IT through games, then became fascinated by how ideas turn into experiences people can see and use.

Away from the screen, I enjoy the gym, cycling, walking and spending time in nature. Those pauses bring a fresh perspective.

ONLINE PORTFOLIO ↗

TEAM CAPSTONE · UX/UI & FRONTEND

GiaSuVLU

Create a space for Van Lang students and learners to connect, from finding a tutor to registering and learning online.

I shaped the UX/UI and interface flows, developed the frontend and connected APIs. My teammate primarily built the database and APIs.

Microsoft school-email sign-in worked. Zoom and payments reached API testing/demo only and were not completed due to legal and cost constraints.

WEB DESIGN · TYPOGRAPHY

Elysian Wedding

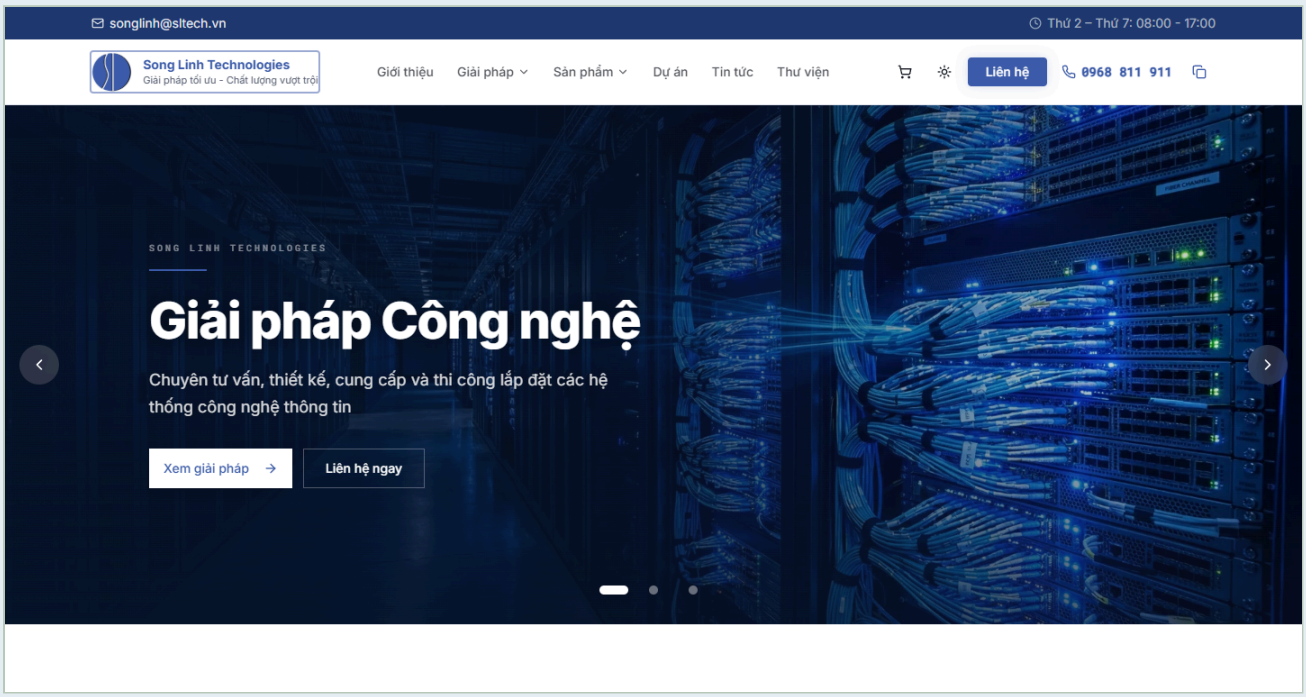

A story to be felt, not just read.

A website for an acquaintance, where I explored the visual language, typography and composition to create a considered experience.

B2B · UX/UI & AI-ASSISTED

SLTech

The company works mainly with partners and major project owners. I shaped the site to communicate its capabilities and projects while making information easy to navigate.

Directed ideas, UX/UI, imagery and layout, using AI agents to support implementation and testing.
